

EVAPORATING DISH

BE 129

Most evaporating dishes are made of porcelain or borosilicate glass. Shallow glass evaporating dishes are commonly termed "watch glasses", since they resemble the front window of a pocket watch. Some used for high-temperature work are of refractory metals, usually of platinum, owing to its non-reactive behavior and low risk of contamination.

FOLLOWING STANDARD

ASTM D4, ASTM D2172, ASTM D4643

TYPICAL SPECIFICATIONS

120 ml capacity, 90 mm Dia × 37 mm height

250 ml capacity, 115 mm Dia × 45 mm height

525 ml capacity, 165 mm Dia × 54 mm height

765 ml capacity, 185 mm Dia × 54 mm height

1285 ml capacity, 215 mm Dia × 63 mm height
