

FILTER PAPER

BE 160

Laboratory filter paper is a **specialized type of filter media** used extensively in scientific, industrial, and environmental applications to separate solids from liquids or gases. It is made from cotton fibers, cellulose, or other materials that provide the necessary structure for filtration.

FOLLOWING STANDARD

As per Standard

TYPICAL SPECIFICATIONS

MODEL	FILTER PAPER SIZE	USED
BE 160-01	9.75" (241mm) OD x 2.5" (64mm) Hole, Size 11.75" OD x 2.5" ID hole	Bitumen extractor
BE 160-02	150 MM DIA	CBR test
BE 160-03	Circle, 12.7 mm	Blaine air permeability
BE 160-04	150 MM DIA	Modified compaction
BE 160-05	38 MM, 50 MM DIA	Triaxial test
